Informations about the handling with COVID19 (Coronavirus) at the Richard Wöhr GmbH

Dear Sir or Madam,

due to the increase in COVID-19 cases in the European Union we share the following information:

At the company Richard Wöhr GmbH ...

- is a team that continuously deals with the topic or the changes evaluates them and if necessary initiates actions
- all employees are instructed to follow basic and effective preventive hygienic measures such as regular hand washing with soap and disinfectants, no shaking hands, keeping a distance, coughing in the crook of the arm, etc.
- some of the administrative staff work in home office and the production if possible works time-delayed to minimize contact times and consequently reduce the risk of spreading
- disinfectants are available at all critical points in the company
- measures were introduced into the logistic processes (gloves required, safety distances in the direct contact)
- visits from customers and suppliers are largely replaced by web-/ telephone conferences
- there are currently (2020/04/08) no reports of COVID19 infections
- there is currently (2020/04/08) no significant influence on our supply chain

This statements are subject to dependencies so that we ask that you to plan requirements in advance so that supply shortages can be avoided as early as possible.

All other important information you can find on the the Robert Koch Institute website <https://www.rki.de>. Richard Wöhr GmbH adheres to the recommended regulations of the Robert Koch Institute and the Health Department.

Please do not hesitate to contact your known contacts at Richard Wöhr GmbH if you have any questions about your business relationships or current projects.
